

# Client Name

## Quality Assurance Analyst

Highly motivated and technical-minded software development professional, seeking to implement QA analysis skills to determine QA parameters, execute manual / automated test cases, and design test procedures appropriate to application, solution, project, and business unit.

- Capable of performing variety of tests, such as regression, platform, and performance testing for Software Quality Assurance.
- Instrumental in testing applications in client / server and web application environments within time constraints to achieve client satisfaction.
- Ability to assess tasks for best testing approach and apply techniques throughout different phases of project.
- Adept at automating testing to reduce time for validation and testing software to solve SQA queries.
- Championed in designing test cases and defect life cycle procedure with basic knowledge of SQL.
- Equipped with exceptional leadership, problem-solving, innovative, analytical, presentation, and time-management skills.
- Technically proficient in Agile scrum, Microsoft Office Apps, and modern SDLC tools, including Git, JIRA, Selenium, Artifactory, Jenkins / TeamCity, and OpenShift.

## Area of Expertise

- System & Unit Testing
- Issue Identification
- Software Quality Assurance
- Regression Testing
- Software / Application Development
- Conflict Resolution
- Project Management
- Agile Methodology
- Team Leadership & Planning

## Career Highlights

**Project Lead, Binder App, Collaborative and Concurrent Notepad Editing App**

**2020 – 2021**

Executed thorough research and analysis in multiple areas, including industry, market, competition, and financial analysis to excel in achieving goals. Maintained Quality Assurance standard by formulating several reports and presentations for senior management at weekly sync ups. Utilized agile approach that emphasized on customer involvement, adaptable planning, continuous evaluation, and risk management, while complying with standards and regulations. Tested application for various times throughout development that resulted in improving testing skills.

- Built notepad application that allows multiple users to edit documents at same time, while maintaining document privacy in React Native.
- Ensured bug-free and smooth application by working in team environment and carrying out various user testing practices.
- Provided Binder app that gives more security in comparison with Google docs as no one else can read any of data in Binder.

## Education & Honours

**Bachelor of Science in Computer Science** | University at Albany, Albany, New York

*Dean's list for four semesters*

## Certifications

Certified Associate in Software Testing (CAST) | Pearson Vue – Scheduled Aug 2021

Unit Testing and Test-Driven Development | May 2021

QA Manual Software Testing Plus Agile and Jira

Software | QA | Manual Testing, SDLC
